Sequence 29, Application US/0995502
| Sequence 29, Application US/0995502
| Patent No. US20020072118A1
| GENERAL INFORMATION:
| APPLICANT: Downs, Diana M. |
| APPLICANT: Grainick, Jeff A. |
| TITLE OF INVENTION: Method for Preventing Superoxide Damage to Cells and TITLE OF INVENTION: Oxygen-Labile Proteins |
| FILE REFERENCE: 960296.9759 |
| CURRENT APPLICATION NUMBER: US/09/955,502 |
| CURRENT FILING DATE: 2001-09-18 |
| PRIOR PAPLICATION NUMBER: 60/24,588 |
| PRIOR FILING DATE: 2000-09-22 |

Sequence 31, Application US/09955502

Patent No. US2002072118A1

GENERAL INFORMATION:

APPLICANT: Downs, Diana M.

APPLICANT: Downs, Diana M.

APPLICANT: Downs, Diana M.

APPLICANT: Grainick, Jeff A.

TITLE OF INVENTION: Method for Preventing Superoxide Damage to Cells and

TITLE OF INVENTION: Oxygen-Labile Proteins

FILE REFERENCE: 960296.9759.95

CURRENT APPLICATION NUMBER: US/09/955,502

CURRENT FILING DATE: 2001-09-18

PRIOR APPLICATION NUMBER: 60/234,588

PRIOR FILING DATE: 2000-09-22

NUMBER OF SEQ ID NOS: 33

SOFTWARE: Patentin Ver. 2.1

SEQ ID NO 31

Patent No. US20020072118A1
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT:
Downs, Diana M.
APPLICANT:
APPLICANT:
GENINCK, Jeff A.
TITLE OF INVENTION: Method for Preventing Superoxide Damage to Cells and
TITLE OF INVENTION: Oxygen-Labile Proteins
FILE REFERENCE: 960296.9759
CURRENT FAPLICATION NUMBER: US/09/955,502
CURRENT FILING DATE: 2001-09-18
PRIOR APPLICATION NUMBER: 60/234,588
PRIOR FILING DATE: 2000-09-22
NUMBER OF SEQ ID NOS: 33
SOFTWARE: Patentin Ver. 2.1
                                                                                                                                                                                                                            Gaps
                                                                                                                                                                                                                                                                                                  1 MARMIHCAKLGKEAEGLDFPPLPGELGKRLYESVSKQAWQDWLKQQTMLINENRL 55

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             RESULT 27
AE0895
conserved hypothetical protein STY3411 [imported] - Salmonella enterica subsp. enterica serovar Typhi
C;Species: Salmonella enterica subsp. enterica serovar Typhi
A;Note: this species has also been called Salmonella typhi
C;Daces 109.Nov-2001 #sequence_revision 09-Nov-2001 #text_change 18-Nov-2002
C;Accession: AE0895
